PROFILE

Junior full-stack developer with one year of professional experience in JavaScript, React and Node. I like turning messy requests into small, working features.

EXPERIENCE

Junior Developer, Bayline Studio **Jan 2025 to present**

- Built a booking page in React and Node for a salon client. Online bookings went from 0 to about 60 a month within 2 months of launch.
- Wrote PostgreSQL queries to fix a slow report. The page load dropped from 9 seconds to under 2 seconds.
- Use Git daily with feature branches, code review and a CI pipeline that runs 80 Jest tests.
- Join client calls and write short release notes in plain language.

PROJECTS

- Recipe Share (2024): full-stack app with sign-in, REST API and a deployed demo. 300 visits in the first month.
- Open source: 3 merged pull requests to a small UI library, fixing accessibility bugs.

SKILLS

JavaScript, TypeScript, React, Node.js, Express, PostgreSQL, Git, Jest, REST APIs, Docker basics, deployed to Vercel and Render.

EDUCATION AND LEARNING

12-month software development bootcamp, 2024, with a final capstone shipped to real users. Completing an AWS Cloud Practitioner course.
