PROFILE

BSc IT graduate who builds small web apps in Python and works well in a team. Looking for a junior developer role where I can ship features and keep learning.

EXPERIENCE

Software Development Intern, Brightlane Logistics Feb 2025 to Nov 2025

- Built a Flask API that gave dispatchers a live list of delayed deliveries. It replaced a daily spreadsheet and saved the team about 3 hours a week.
- Wrote PostgreSQL queries and two migrations for a new reporting table, and added 25 pytest tests.
- Worked in a 4-person team using Git branches and pull requests. Reviewed 15 pull requests from teammates.
- Presented a weekly demo to the operations manager, who is not technical.

PROJECTS

Exam Timetable Planner (personal project, 2025)

- Django web app used by 40 students at my campus to find clashes. Deployed on a free host, code on GitHub with a README and 12 commits a week during build.

Budget Tracker CLI

- Python command-line tool using SQLite. Published on GitHub, used by my family.

SKILLS

Python, Django, Flask, SQL (PostgreSQL, SQLite), Git, pytest, basic Docker, HTML/CSS.

EDUCATION

BSc Information Technology, 2024. Completed a data engineering short course in 2025 and built a small ETL pipeline as the final project.
