PROFILE

Former high school maths teacher, now a self-taught developer. I spent 2 years learning to code at night and have built three projects used by real people.

PROJECTS

Homework Helper (2026)

- Node.js and React web app where learners get hints on maths homework. Used by 150 learners at two schools. I wrote the SQL schema (PostgreSQL), the API and about 40 tests. Deployed and maintained for 5 months.

Marks Importer (2025)

- Python script that reads teachers' Excel mark sheets and loads them into a database, with error reports for bad rows. Replaced a manual process for 20 teachers.

Class Timetable Bot (2025)

- Small Python tool that checks timetable clashes. Open source with 15 commits and two pull requests accepted from another contributor.

EXPERIENCE

Maths Teacher, Highveld Secondary 2018 to present

- Taught Grade 10 to 12. Explain complex ideas in simple steps to groups of 40, and mentor new teachers.

SKILLS

JavaScript, React, Node.js, Python, PostgreSQL, Git and GitHub, Jest, pytest.

EDUCATION

BEd (Mathematics), 2017. Completed web development and data courses online, each with a published project.
